

March 2021

WELDONE Partners are continuously working to achieve the project's purposes!

WELDONE partners engaged in several meetings during this period to discuss the implementation of the project's activities towards the achievement of its outcomes

WELDONE Online-Meeting 09.11.2020

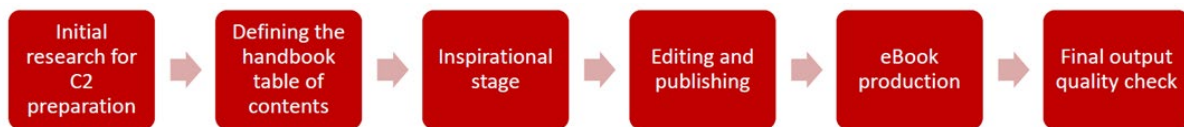

Due to the pandemic situation, meetings of the partnership are monthly organized, in virtual mode using different digital platforms (Skype, Teams, Zoom). All partners participated in the meeting organized in November 2020. This meeting was dedicated to the analysis of the first two Intellectual Outputs of the project, which were the most advanced by that time:

1. **IO1:** Analysis of activities related to the WELDONE Train of Trainers' Curriculum development. It has been concluded that the designed steps are according to the timeline:

2. **IO2:** WELDONE Conceptual Handbook

A reminder of the road-map foreseen to obtain the expected quality of the IO2 was shared.

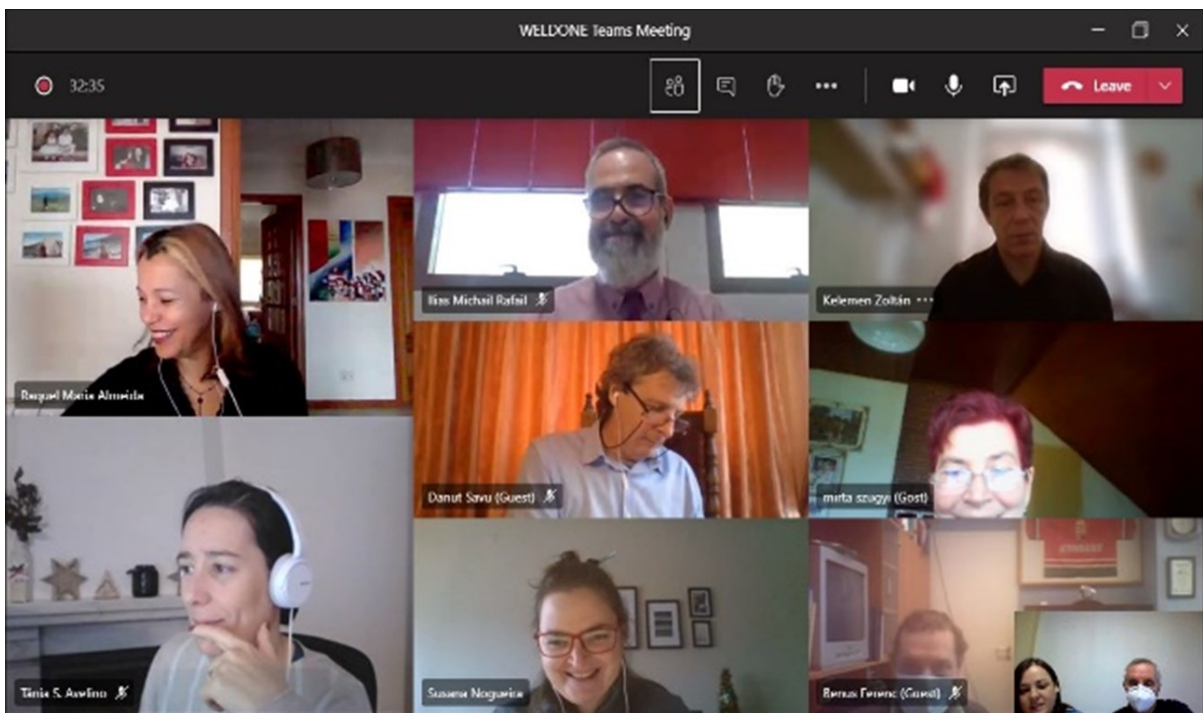

All partners agreed on the following articles to be part of the Handbook:

Raquel Almeida	• Why embedding key competences development in technical training is a must
Zeljko Habek	• How to link digital natives and digital immigrants in the educational process?
Gordana Đeldum	• The Importance of Media Literacy in Education
Susana Nogueira	• Flipped Classroom: How to have more work time in classrooms? • The impact of Innovative training methodologies on EWF Qualification System
Zoltán Kelemen	• Press Play to Start
Sorin Savu	• Industrial weld, Conceptualization, Simulation - Triangle on top of the problem-based learning
Edita Margeta	• The use of VWTS in training welding trainees and experienced welders
Virginia Rista	• The 3 Dimensions Competence in Adult Learning Process
Danut Savu	• From touch to virtual in welding - Sensorial experience-based learning
Tânia Alves	• Project based learning and the competences and attitudes that come with it
Ivan Juraga	• By modernizing the education of welders to better welding
Ferenc Benus Jr.	• XR in welding training

WELDONE Online-Meeting 09.12.2020

During the meeting held in December 2020, an overview of the dissemination activities carried out until then, and a final analysis of the Conceptual Handbook were done.

According to the analysis of the dissemination activities, in six months WELDONE had increased its impact, with:

- **81** Dissemination Activities conducted by Partners
- **363** participants (incl. internal staff)
- Potentially **150 000** people reached in the first year
- WELDONE Website|91 users/470 views
- WELDONE Facebook account | 45 Posts / 214 followers

Among these activities, it is important to mention the presentations done by EWF within the:

- **57th General Assembly** (17 Nov. 2020) – 60 participants
- **Next Generation of European Training for Manufacturing** (18 Nov. 2020) – 32 participants

Raquel Almeida (ISQ) presented the draft version of the printed Conceptual Handbook. The Conceptual Handbook includes articles written by all WELDONE partners and some associated partners on the matters the project addresses.

After agreement on the final version, the Conceptual Book will be converted in e-Book and it will be available to all interested individuals and groups in English and national languages of the consortium.

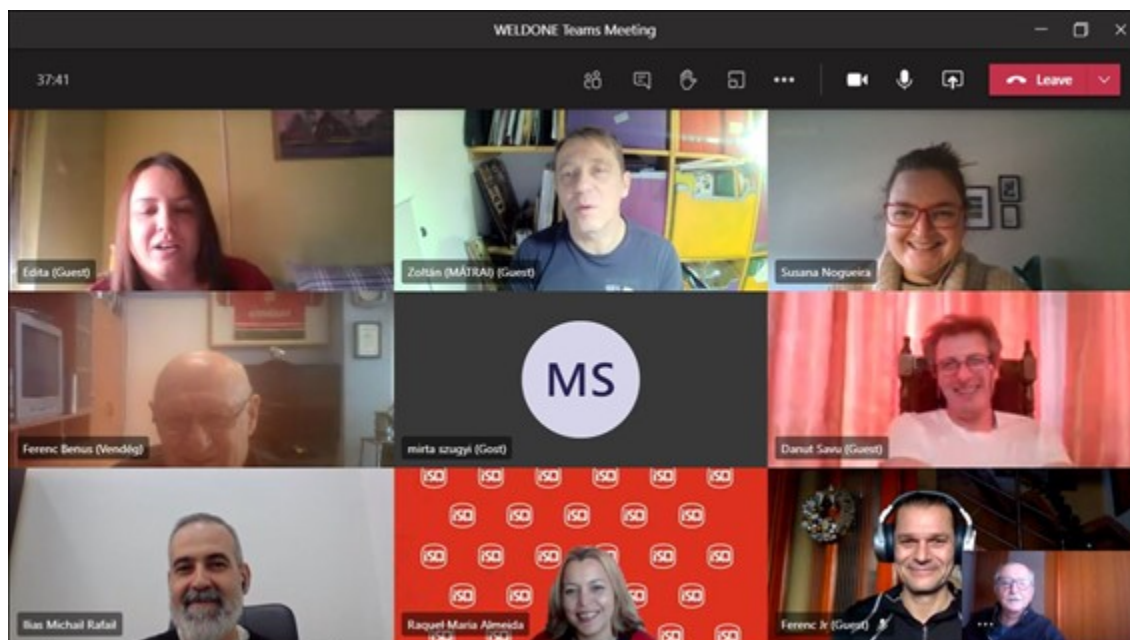

WELDONE Online-Meeting 12.01.2021

The new year, 2021, started with full approach of the activities to develop the third Intellectual Output - How to get WELDONE and the first meeting of the year was organised for that purpose. MATRAI's researchers, Ferenc Benus Jr. and Zoltan Kelemen, presented the main steps to be followed by partners in order to build this Intellectual Output, which is a toolkit for those who intend to organize training activities for trainers and teachers, in the **WELDONE way**.

This Toolkit is meant to be a "ready-to-use" resource to facilitate the implementation of the curriculum, increasing also its transferability potential. It includes videos, exercises, case studies

and other resources/tools that the partners deem to be necessary for a successful and accessible toolkit.

All partners actively participated on the meeting and the discussions were a mix of brainstorming, creativity and applied social science.

For the implementation of the WELDONE ToT curriculum, the Workshop Model will be used. In this output, partners are preparing a set of educational resources to support the implementation of these workshops.

Materials for the four basic parts of the workshop will be available in the "How to get WELDONE" Toolkit.

In the second part of the meeting Susana Nogueira of EWF presented the status of the dissemination activities, accelerating the development of the poster and re-scheduling the elaboration of the e-Newsletters due to the pandemic situation, which blocked the implementation of key learning and training activities.

WELDONE Online-Meeting 10.02.2021

The meeting was dedicated to discussions related to IO2, which reached the final form, to the best practices, which are the bases for the IO3, and, as in any previous meeting, to the dissemination activities.

Dissemination in action...

It has been decided to participate with at least 2 articles in the Conference of the Romanian Welding Society, which is co-organized by the International Institute of Welding.

in continuous action...

Increasing dissemination on LINKEDIN

The screenshot displays the LinkedIn profile of WELDONE, a company focused on boosting innovation in welding training. The page includes a header with navigation links (Home, My Network, Jobs, Messaging, Notifications, Me) and a search bar. The main content area features a large banner with the WELDONE logo and tagline, followed by a section for analytics (Unique visitors, New followers, Post impressions, Custom button clicks) and a 'Start a post' button. The 'Updates' section shows a recent post by Željko Habek dated 2/11/2021, mentioning an online meeting. The right sidebar contains a 'Manage' section with links to Events, Hashtags, and a 'Show posts about WELDONE' button.

Important outcome to the final step!

IO2 received its final form and soon will be available both in a printed version and as an e-Book.
