October 2020

WELDONE: Coping with the Global Pandemic

The global pandemic that caught all EU countries by surprise in the beginning of 2020 had impact not only on Member States' societies and economies, but also on the implementation of Erasmus+ funded projects, including WELDONE.

Even though important activities for the development of WELDONE outcomes were suspended (i.e. learning activities), partners were able to adapt and to continue working together in an effort to cope with all the limitations imposed by this situation.

The common concern was to keep meeting to discuss the main subjects at hand, and to keep working so that all the project's milestones were achieved, according to plan.

WELDONE partners have been coping with the global pandemic, and will continue doing so until the necessary conditions are gathered to resume all suspended activities.

WELDONE ToT Curriculum | May 6th 2020 Online Meeting - Hosted by EWF

Did you know that there are new pedagogical approaches that improve learners' experience with learning, motivating them to be more active in the learning process?

WELDONE is creating a curriculum for a Train of Trainers course that capacitates trainers from EWF Qualification System and educators from Science, Technology, Engineering and Mathematics (STEM)

sectors, to deliver technical training in a WELDONE way - using alternative pedagogical approaches and embedding the development of key competences in technical subject's training.

WELDONE partners are in the verge of completing the first step towards the conclusion of a "close to final version" of each of the seven Competence Units (CUs) that are part of the ToT Curriculum. The constant exchange of inputs between partners has been crucial for the quality of these materials, prepared to address transversal subjects related to technical training and the development of key competences, crucial for helping trainers and educators to ensure their learners' engagement with the learning process, fostering their future professional success.

WELDONE Conceptual Handbook | May 20th 2020 Online Meeting - Hosted by ISQ

Partner present by: ISQ, EWF, ASR, MATRAI, IOS, IEKEP, STRUKA

WELDONE partners are currently developing an e-book containing articles and essays addressing the innovative pedagogical approaches suggested by WELDONE.

This book will be available in EN, GR, HR, HU, PT and RO and will provide its readers (Educational organizations and other sectors that may benefit from it) essays and examples of good practices related to the subjects covered by WELDONE ToT Curriculum.

The advantage of being an e-Book is that it will be accessible anytime, anywhere.

For more news about this innovative WELDONE outcome, please check Facebook and follow the project's activities at <https://www.facebook.com/weldone.project>.

How to get WELDONE | May 27th 2020 Online Meeting - Hosted by MATRAI

Partner present by: ISQ, EWF, ASR, MATRAI, IOS, IEKEP, STRUKA

Another WELDONE outcome that will be developed is a toolkit that will allow for the implementation of the ToT Curriculum during dedicated workshops.

This “ready-to-use” toolkit will contain a set of pedagogical and practical resources that focus on the development of specific key competences.

WELDONE partners will collect videos, exercises, case studies and more, gathering these resources on this toolkit, which will be available in the future for any Vocational Education and Training teacher/trainer or provider.

More news about this valuable resource will be provided on the next WELDONE Newsletter.

In the coming months, between November 2020 and the end of January 2021, we will focus on the development of *IO2 Conceptual Handbook* and *IO3 How to get WELDONE*.
